

Understanding and Treating Client with Dual Diagnoses

DESCRIPTION

Dual diagnosis, also known as co-occurring disorders, refers to the simultaneous presence of a mental health disorder and a substance use disorder and requires an integrated approach to treatment and support. This workshop aims to equip mental health professionals with the necessary tools and strategies to provide services to this population.

OBJECTIVES

Upon completion of this course, the participant should be able to:

1. Gain a comprehensive understanding of dual diagnosis.
2. Explore the definition, prevalence, and various types of co-occurring disorders, including common combinations of mental health and substance use disorders.
3. Recognize diagnostic challenges and assessment techniques.
4. Identify the unique diagnostic challenges faced when working with individuals with dual diagnoses and learn effective assessment strategies to accurately evaluate and diagnose co-occurring disorders.
5. Explore evidence-based treatment approaches.
6. Review evidence-based interventions and treatment models specifically designed for individuals with dual diagnoses, including integrated treatment approaches and harm reduction strategies.
7. Acquire practical skills to engage, motivate, and build therapeutic alliances with individuals with dual diagnoses, including techniques for addressing resistance and ambivalence.

FEE: Consortium Member:\$45 Non-consortium Member \$90

Deadline to register: 2/13/2025

Cancellations and Refund Policy: Cancellations must be made prior to each program's cancellation deadline date as listed on its program details page in order to be eligible for a refund. If you paid a registration fee for your in-person or webinar program and cancel via the registration system by the cancellation refund deadline, you are eligible for a full refund (minus any material fee, if applicable) Refunds are typically processed within 10-15 business days.
