

Basic Fetal Monitoring

This introductory course provides a basic level of understanding and competence in electronic fetal heart monitoring for nurses new to Women's Services.

LEARNING OBJECTIVES

Upon completion of this program, the participant should be able to:

1. Identify fetal heart rate baseline characteristics and uterine activity.
2. Differentiate patterns of EFM.
3. Discuss the appropriate interventions for FHR patterns.
4. Review FHR strips and make appropriate nursing interventions.

TARGET AUDIENCE

Nurses new to Women's Services or other specialties who need a basic understanding of electronic fetal monitoring.

FEE
