# AWHONN: ADVANCED FETAL MONITORING

The advanced Fetal Monitoring course expands on the knowledge and physiological principles presented in the AWHONN Intermediate Fetal Monitoring Course. This course uses a case study approach to focus on the analysis of maternal-fetal physiology related to complex clinical info mation and fetal heart tracings. The course emphasizes the physiology of fetal-maternal oxygenation, the interpretation of tracings, the selection of clinical interventions, and perinatal risk-management principles.

#### **Course Material**

Each participant must purchase a new/unused AWHONN Advanced Worshop-Student Materials from www.awhonn.kendallhunt.com. Each book has a scratch -off coding to access online knowledge integration test. The course materials is \$110 for both AWHONN members and nonmembers.

### Wednesday, March 26, 2025

### Wednesday, May 28, 2025

### Wednesday, August 20, 2025

#### INSTRUCTOR

Jennifer Desai, RNC-OB, C-EFM, MSN OB Outreach Educator - Pee Dee Region McLeod Regional Medical Center

#### TARGET AUDIENCE

Nurses and providers who have previously completed an Intermediate FHM course and who use fetal heart assessment and monitoring technology in an antepartum or intrapartum setting

#### LOCATION

McLeod Medical Park West Pee Dee AHEC Conference Room, Suite 350 101 S, Ravenel Street Florence, SC 29506

#### TIME

8:30am - 5:00pm

#### FEE

\$10

Registration Deadline: 7 days prior to the class date

#### CREDIT

CNE will be awarded by AWHONN. 7.0/7.0 CNE/CME contact hours will be provided for completion of the course in its entirety.

Wednesday, Nov 19, 2025

### Wednesday, Dec 17, 2025

#### **LEARNING OBJECTIVES**

Upon completion of this program, the participant should be able to:

- 1. Describe the physiologic principles of maternal and fetal oxygen transfer as they apply to principles of fetal heart monitoring.
- 2. Appraise the fetal response to maternal pathological and physiological adaptations during the labor process.
- 3. Analyze complex case studies and tracings using standardized terminology.
- 4. Appy perinatal risk management principles, communication techniques, and documentation strategies to complex and challenging patient scenarios.
